DELIVERY AND IMPROVEMENT PLAN 2023/24

Inverclyde Alliance

Community Safety Partnership Delivery and Improvement Plan 2023/24

In June 2023, Inverclyde Alliance Board approved Inverclyde's Community Safety Strategy 2023-26 'Keeping Inverclyde Safe Together'. The strategy established several priorities for the community safety partnership.

Priority 1: There is a reduction in the level of violence and antisocial behaviour within our communities

We will do this by:

- Collaboratively promoting local and national campaigns which focus on crime prevention
- Develop and coordinate a programme of partnership activities to tackle violence, deliberate fire raising, carrying weapons, and antisocial behaviour through a prevention and education model
- Identify opportunities for joint engagement activities and programmes for young people
- Work with partners to prevent, reduce and solve crime and antisocial behaviour

Priority 2: There is a reduction in the number of serious accidents at home and on our roads

We will do this by:

- Work with partners to deliver interventions that target those most at risk from unintentional injury and fire at home, and promote referral pathways
- Continue to educate children, young people, and adults on the risks from fire and other safety risks in the home
- Continue to deliver road safety education in school
- Improve driver behaviour and reduce injury through engagement and proportionate enforcement of legislation
- Strengthen partnership working across road safety and road crime

Priority 3: Communities in Inverclyde feel safe and are protected, particularly those most at risk

We will do this by:

- Increasing awareness of community safety and ensure it is important in the local landscape
- Increase positive community messaging and engagement to improve safety perceptions
- Sharing information to identify vulnerability and work together to reduce risk and prevent harm
- Supporting campaigns, initiatives, and projects that focus on, or increasing feelings of, safety
- Raise awareness of scams, bogus callers, online exploitation, and digital safety
- Build confidence amongst victims and the community to report their experiences

Priority 4: Strong and effective joint working arrangements across the community planning partnership are developed to promote a holistic approach to community safety

We will do this by:

- Strengthening relationships with communities and actively seeking to engage stakeholders in our work to tackle community safety
- Empower residents by providing them with tools and resources they need to protect themselves and their communities
- Implementing joint working arrangements and projects between the community safety partnership and other community planning partnerships, such as Community Justice
- Support locality partnerships across Inverclyde in responding to community safety issues that impact localities and their communities.

The Delivery and Improvement Plan shows how the partnership will help to deliver the Partnership Plan priorities through the implementation of the following workstreams:
