

A GUIDE TO PRIMARY CARE

PHARMACY

For more information
on Primary Care
services please scan:

Primary Care Pharmacists & Community Pharmacists

Primary Care Pharmacists work within and alongside GPs helping patients use medicines safely. Pharmacists can help with medication information and advice, support clinics, medication reviews and prescription requests.

Pharmacy Technicians and Pharmacy Support Workers process medication changes from hospital discharges and outpatient letters.

Should you need advice or guidance about your medications, please speak to the GP Pharmacist.

NHS Pharmacy First Scotland

Visit a local Community Pharmacy for information and advice.

Pharmacy First Scotland is a service provided by Community Pharmacy. This service offers advice, guidance and treatment for conditions including:

- Sore throat and cough
- Mouth ulcers, earache and head lice
- Cold sores, warts and verrucas
- Indigestion, constipation, diarrhoea
- Allergies, hay fever and impetigo

Please visit www.nhsinform.scot for further support.
