

Support for people setting up their own business and existing businesses in Inverclyde

We understand both starting up and growing a business can be challenging, so we have developed a range of fully subsidised programmes to assist you, through the Business Development Team at Inverclyde Council and Business Gateway Inverclyde. The support is available to both businesses working from commercial premises and those based at home.

The free comprehensive package of assistance includes:

- discretionary grant and loans;
- practical one-to-one advice from experienced advisers;
- training webinars;
- referrals to public sector partner organisations providing support in Scotland;
- access to market intelligence.
