

SCOTTISH
FIRE AND RESCUE SERVICE
Working together for a safer Scotland

**Working together
for a safer Scotland**

Inverclyde
council

Report to:	Local Police and Fire Scrutiny Sub Committee
Date of Report:	5th September 2017
Report by:	David Proctor, Local Senior Officer (LSO) Scottish Fire and Rescue Service

Subject:	Scottish Fire and Rescue Service (SFRS) Report
----------	---

PURPOSE OF THIS REPORT

The purpose of this report is to inform the Local Police and Fire Scrutiny Sub Committee of the Scottish Fire and Rescue Service's (SFRS) performance and activities covering the three month reporting period from 1st June 2017 to 31st July 2017.

This report reflects the Ward boundaries prior to the Election in May 2017. SFRS ICT colleagues are working on the reporting tools used for data analysis and will make the amendment to boundaries for future reports

PERFORMANCE

The information provided in this report and attached appendix relates to the specific key performance indicators detailed in the Inverclyde Local Fire and Rescue Plan 2014-2017. The SFRS Local Senior Officer will be happy to meet with any Elected Members who wish to discuss specific Ward issues.

A summary of the key performance indicators is detailed below:

- a. The total number of Accidental Dwelling Fires decreased from **23** in the same period in 2016 to **9** in the current reporting period.
- b. The total number of All Fire Casualties decreased from **9** in the same period in 2016 to **4** in the current reporting period.
- c. The total number of incidents involving Deliberate Fire Raising decreased from **73** in the same period in 2016 to **35** in the current reporting period.
- d. The total number of Fires in Non-Domestic Buildings decreased from **5** in the same period in 2016 to **3** in the current reporting period.

- e. The total number of Unwanted Fire Alarm Signal incidents decreased from **83** in the same period in 2016 to **59** in the current reporting period.

- f. The total number of Road Traffic Collisions incidents attended by SFRS which resulted in casualties, decreased from **4** in the same period in 2016 to **3** in the current reporting period. The number of recorded casualties increased from **4** in the same period in 2016 to **7** in the current reporting period.

PRIORITIES & INTERVENTIONS

SFRS is committed to working in partnership with Community Planning partners in the public, private and voluntary sectors in order to work together for a safer Scotland. Strengthening our relationship with and working in partnership to add value to our communities is critical to the success of our strategy.

The following activities are illustrative of SFRS arrangements in terms of partnership working and targeted engagement:

- a. The Local Area Liaison Officer (LALO) attends community safety/wardens meetings within Inverclyde on a weekly basis and provides statistics of incidents within the Local Authority Area to ensure partners are aware of all fire related anti-social activity. This forum continues to deliver on achieving joint positive initiatives and outcomes. In addition to this meeting a multi-agency operational meeting has been set up to allow partner agencies to share information on incidents and activity's within Inverclyde. WM John Mitchell represents SFRS at this meeting. It is hoped that this forum will be developed over the coming months to fine tune the information shared to provide outcomes for the partnership.

- b. The Community Action Team (CAT) have delivered a fire safety talk Health and Social Care Partners

- c. The CAT and operational crews worked closely with a number of key partners to provide reassurance visits in Multi Storey flats within Inverclyde following the tragic events at Grenfell Towers.

- d. The CAT has supported operation colleagues in delivery of the Summer Thematic Action Plan.

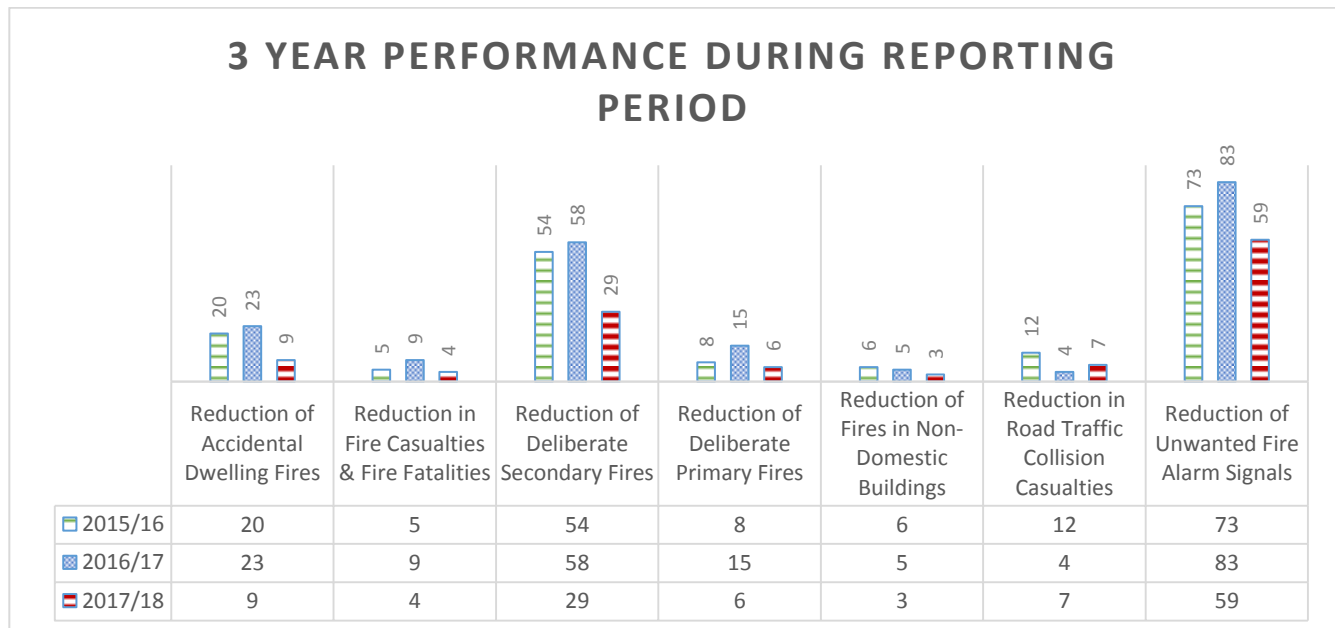

- e. A total of 286 Home Fire Safety Visits (HFSV) was carried out in Inverclyde during the reporting period. These HFSVs are carried out by our operational personnel and Community Action Team (CAT) officers who will conduct these visits jointly with partner agencies where deemed appropriate. Of these HFSVs:
 - i. 19 were as a result of high risk referrals from partners to SFRS.
 - ii. 57 were as a result of Post Domestic Incident Responses (PDIR). The SFRS conducts a PDIR at all domestic dwelling incidents (includes fire alarm actuations and special services). This involves positive engagement with the occupier(s) of the affected property and neighbouring properties by SFRS personnel. Fire safety advice and support are provided; where required SFRS provide and fit 10 year battery powered smoke detectors

RECOMMENDATIONS

Local Police and Fire Scrutiny Sub Committee members are asked to note the contents of this report and the attached appendix.

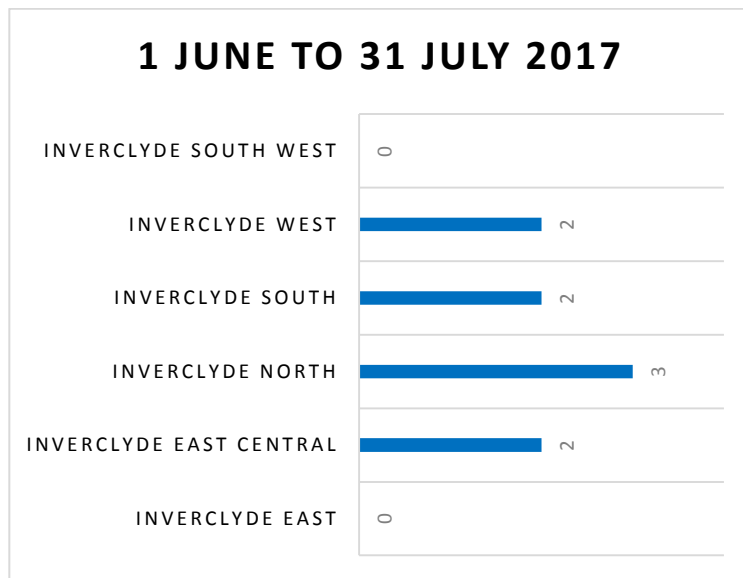

The graph below provides a comparative overview of the activity levels within the reporting period over the last 3 years.

1. THREE YEAR PERFORMANCE OVERVIEW

2. REDUCTION OF ACCIDENTAL DWELLING FIRES

2.1. Incidents by Ward

The slightly higher levels of activity in Wards North and East are a direct correlation to the number of residents and homes within each locality.

Over the reporting period there have been no significant incidents or trends out with the cause of fire detailed below.

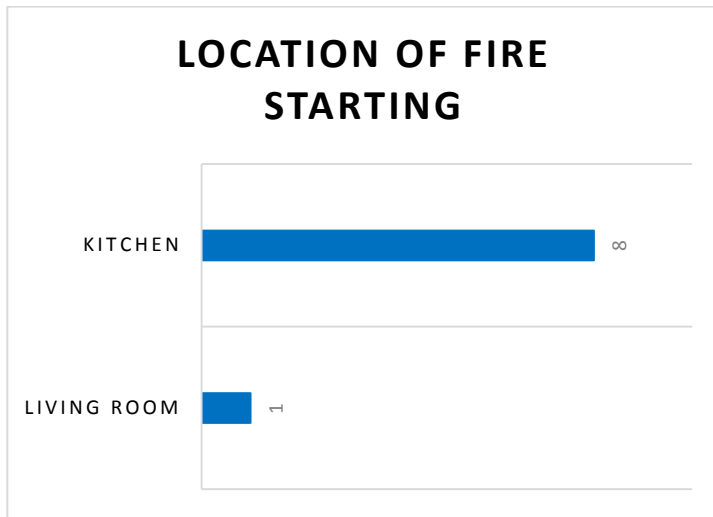

2.2. Cause of Fire

As is evident from graph 2.2 cooking remains the most significant cause of accidental dwelling fires in Inverclyde. This reflects the trend across Scotland.

However further analysis of the information has shown that the majority of the incidents are small in nature and require no action by the Scottish Fire and Rescue Service (SFRS). The increase in smoke and heat detectors within homes has provided early warning and intervention.

2.3. Location of Fire

The information within this graph links directly to the 2.2 where cooking was identified as the most common cause of fire.

SFRS personnel carry out Post Domestic Incident Response (PDIR) visits and provide residents with information on safe cooking at each incident they attend of this nature and provide additional safety guidance at the Home Fire Safety Visit (HFSV)

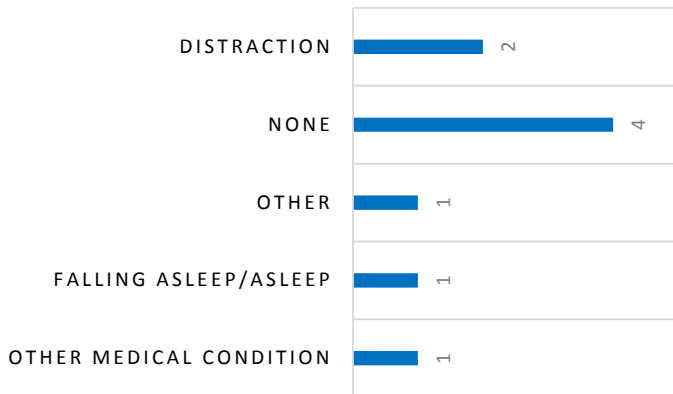

2.4. Human Factors

Of the 9 incidents we attended 6 were not influenced by drugs or alcohol.

However distraction still has a bearing on accidental fires and this is a hard factor to resolve.

FACTORS CONTRIBUTING TO FIRE STARTING

Distraction includes conditions such as alcohol/ drug (prescribed or other) use, mental health, capability and individuals dealing with other matters and forgetting that they have left something cooking.

It is also noted from the information within this graph that there were no contributory factors in 4 of the incidents and was deemed purely accidental.

3. REDUCTION OF FIRE CASUALTIES

3.1. Casualties by Ward

There were 4 recorded fire casualties during the reporting period. 3 in Inverclyde South and 1 in Inverclyde North.

3.2. Casualties by Age and Gender

The casualty profiles were 1 male (60 to 69 years of age) and 3 female, 1 at 40 to 49 years of age, 1 at 50 to 59 age range and 1 at 80 to 89 age range. Over the past two years there has been a growing trend of older females being the most at risk of harm from fire; this is not evident at this time as being a similar trend with Inverclyde.

3.3. Extent of Harm

3 casualties were removed to hospital with slight injuries and taken as a precautionary measure. The other received first aid at the scene. The positive impact of early warning of fire provided by either standalone or linked smoke alarms is evident in terms of the reduction in the number of severe dwelling fires and the associated level of fire related injuries compared to 10 years ago.

4. REDUCTION OF DELIBERATE FIRE SETTING

4.1. Primary Fires

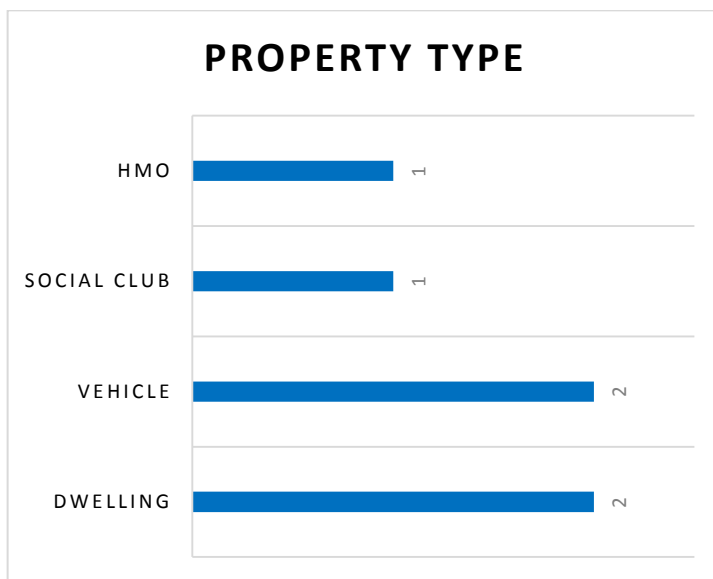

Primary fires are classed as those involving property which has a specific private or commercial value; and generally relates to building, structures or vehicle fires. During June and July 2017 there were a total of 6 deliberate primary fires; this was a decrease when compared to the same period in 2016 when there were also 15 deliberate primary fires.

4.1.1. Incidents by Ward

Deliberate fire setting is a criminal offence and SFRS will request Police Scotland to attend suspected deliberate primary fires when deemed appropriate. The SFRS Local Area Liaison Officer attends regular meetings within Inverclyde to provide fire activity overviews for action as appropriate.

4.1.2. Property Types

SFRS officers will also complete Community Intelligent Reports at incidents where deliberate fire setting occurs; these are passed to Police Scotland where relevant information is gathered and used to support further investigation.

4.2. Secondary Fires

Secondary fires are classed as those involving derelict property (structures or vehicles), refuse, grassland and scrubland. During June and July 2017 there were a total of 29 deliberate secondary fires; this is a decrease when compared to the same period in 2016 when there were 58 deliberate secondary fires. There has been extensive engagement with youths through school and club talks by both SFRS and partnership agencies; it is hoped that these interventions have in part contributed to the reductions.

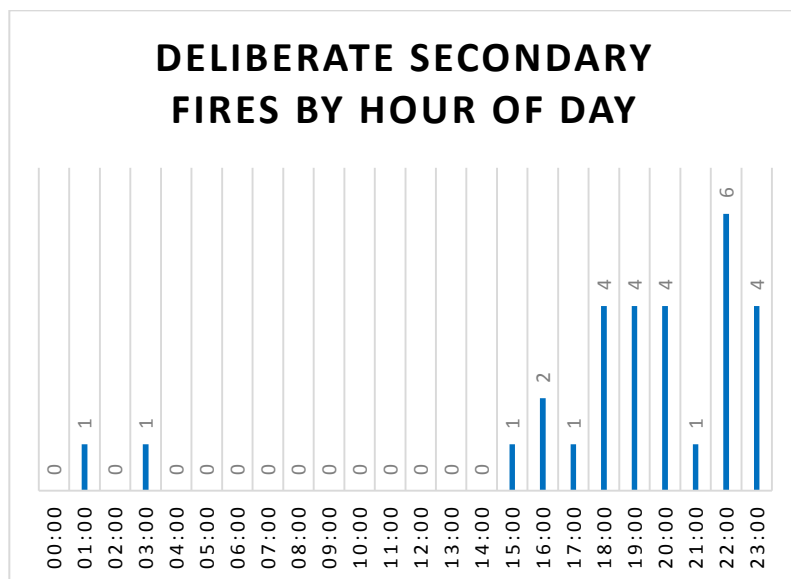

4.2.1. Incidents by Ward

SFRS works closely with our partners to provide appropriate engagement, education and intervention approaches.

Schools in areas identified as having higher fire incidents are targeted and the CAT officers actively engage with the pupils to educate them on the dangers and subsequences of wilful fire setting.

4.2.2. Time of Day

Graph 4.2.2. shows it is evident the vast majority of fires occurred between 15:00hrs to 21:00hrs; this pattern leads us to believe the majority of these fires have been started by school age young people who outwith these times will either be in bed or at school.

The Schools programme addresses wilful fire setting and educates young people on the impact of available front line emergency resources attending secondary fires and not being available for life threatening emergencies.

4.2.3. Property Type

Fires involving grassland, scrubland and pastures accounted for the majority of deliberate secondary fires in Inverclyde. These fires require significant SFRS resources to bring them to a safe close.

Work is on-going with Police Scotland and the Wardens service to identify the fire setters within areas of higher activity to enable appropriate interventions to be administered.

5. REDUCTION OF FIRES IN NON-DOMESTIC PREMISES

This category includes commercial premises, private lockups/ garages and other structures. These incidents are included in the Deliberate Primary Fires referred to in section 3.1.

5.1. Incident by Ward

There were a total of 3 recorded fires in non-domestic premises during the reporting period:

- Inverclyde East (1)
- Inverclyde East Central (2)

5.2. Property Types

The types of properties include:

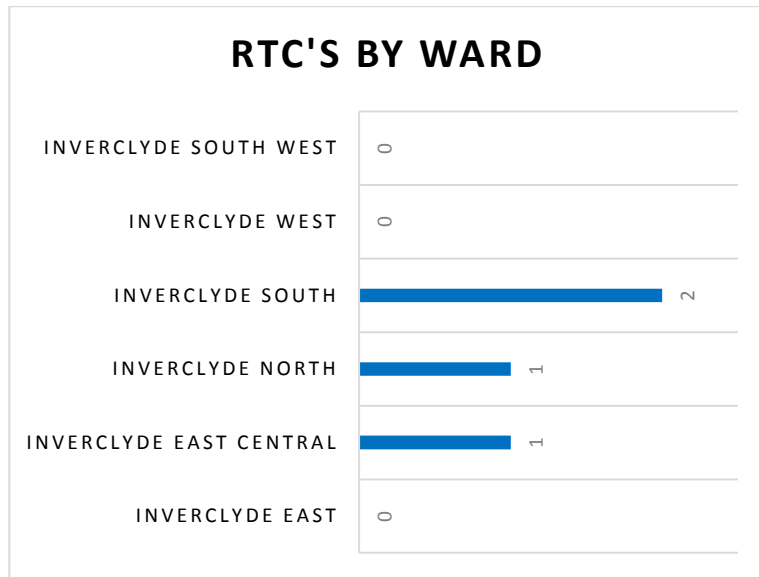

- Sporting Venues
- Retail Warehouse

All fires in non-domestic premises which are classed as relevant premises under The Fire (Scotland) Act 2005 will be subject to a post fire audit. These are conducted by specialist Fire Safety Enforcement Officers (FSEO) who will carry out a full inspection of the premises and all paperwork required under the Act; where deficiencies in fire safety management arrangements are identified the 'duty holder' will be issued with a notice as appropriate.

Private sheds and garages do not come under the Fire (Scotland) Act 2005 but are classed as non-domestic.

6. REDUCTION OF CASUALTIES IN NON FIRE EMERGENCIES

6.1. Road Traffic Collision Incidents by Ward

There were a total of 3 Road Traffic Collisions (RTCs) which SFRS attended in the reporting period; this will not reflect the numbers attended by Police Scotland which will potentially be higher.

This is due to the fact SFRS only attends incidents of this nature when requested to assist in extrication of casualties or to make the scene safe

6.2. Road Traffic Casualties (RTC) by Ward

There were 7 RTC related casualties recorded by SFRS in the Wards highlighted in 6.1. All 4 had slight injuries and went to hospital for precautionary check only. There were no fatalities within this reporting period.

7. REDUCTION OF UNWANTED FIRE ALARM SIGNALS

SFRS attends a range of false alarm incidents which include system faults, accidental actuation of fire alarm, malicious calls and good intent calls. SFRS is focused on reducing the associated road risk posed by 'blue light' journeys linked to our attendance at Unwanted Fire Alarm Signals (UFAS) incidents. There is a national policy in place which ensures we are adopting a standardised approach to positively engage and educate duty holders at premises which have fire alarm system actuations which are not due to an actual fire.

7.1. Incident by Ward

South Ward has the highest number (19) of Unwanted Fire Alarm Actuations (UFAS); the majority of these incidents occurred at Educational or Hospital facilities. This is confirmed in the following graph on property types.

7.2. Property Types

From the graph it is evident that Hospitals and Medical care facilities within Inverclyde accounted for a total of 14 UFAS incidents during the reporting period.

Incidents in schools accounted for 10 UFAS incidents.

7.3. Cause of Actuation

The SFRS works closely with all relevant premises where UFAS occur. Where the number of actuations are above acceptable standards the FSEO team will carry out a fire safety audit of the premises to identify deficiencies in the management of alarm system and actuations; where deemed necessary notice of fire safety deficiency notice will be issued.
