4.0 BACKGROUND

- 4.1 The role of Internal Audit in Risk Management is defined as contributing to the management of risk by evaluating and providing assurance on risk management processes. The assurance extends principally to two main areas, firstly that major business risks are being managed and secondly that the Risk Management and Internal Control Framework is operating effectively.
- 4.2 The responsibility for managing risk lies not with Internal Audit but with service management, with corporate consistency being supported through the Corporate Management Team by the Chief Internal Auditor.
