

2.8 The main reason for the consultation and engagement exercise was to determine the preferred location from the community in relation to the three centres that currently exist. The survey asked the community to rank their preferences. Not all of those who responded with a first preference went on to choose a second and third preference (35 people gave a first preference only). The figures in Q5 of the appendix collated by Survey Monkey assumes that all preferences were filled in. For clarity the numbers below show the percentage collated by all of those who expressed a first preference, all of those who expressed a second preference and all of those who expressed a third preference. Overall, there remains a clear preference for Grieve Road.
