Officer

Contact Officer: Alan Puckrin Contact No: 01475 712223

Subject: SEMP – Review of Funding Model and Possible Opportunities

1.0 PURPOSE

1.1 The purpose of this report is to advise the Committee of the opportunities which arise from the annual review of the SEMP Funding Model.

2.0 SUMMARY

- 2.1 Elsewhere in the agenda there is the review of the Schools Estate Funding Model 2012. The report highlights £2.6 million reduction in net costs due to the estimated SFT Grant in relation to St Patrick's Primary and a £1 million reduction in the contingency set aside for the Shared Campus. In addition the report highlights a £450,000 reduction in projected loans charges following the high levels of borrowing at low interest rates which have been undertaken in the last 12 months.
- 2.2 Appendix 1 contains the letter received by the Council on the 20th September from the First Minister and David O'Neill (Cosla President) regarding accelerating capital investment to support economic recovery. Within this letter there is the indication that the Scottish Government would be amenable to supporting proposals advanced by Local Authorities to advance capital spend.
- 2.3 The Scottish Futures Trust have awarded a grant of up to £5.3 million for the ASN new build as part of the shared campus. Indications are that up to £450,000 could be clawed back were the Council not to utilise any of the contingency set aside for the project. Additionally the SFT have announced that St Patrick's has been selected for funding as part of the third phase of the schools for the future programme. Officers have prudently estimated that the intervention rate will be 30% rather than 50% on the basis that the SFT favour new build schools with low costs per square metre. Evidence suggests that Inverclyde Council has proportionally not fared well from the £1.2 billion Schools for the Future Programme largely due to the fact that it is in the middle of implementing a fully funded high quality School Estate Asset Plan.
- 2.4 Following the opening of Whinhill Primary School Highlanders Academy is currently lying vacant and has the potential to form a second decant school in order to accelerate the primary school refurbishment programme and in the potential save the Council money in the year on year inflationary increase in building costs. It should be noted that Highlanders would require approximately £200,000 investment to bring it back into an acceptable condition for use as a decant school. Additionally, as the school has been declared surplus to requirements a Committee decision would be required to bring it back into operational use.

- 2.5 The proposals also allow the acceleration of other Primary School refurbishments at St Mary's PS and St Ninian's PS as a result of more efficient use of the former Sacred Heart PS decant facility.
- 2.6 It is known that Property Services will experience a severe down turn in fee income in the next 2 years and this presents an HR challenge in terms of managing such a reduction in the workforce in a short period of time. By advancing an element of the primary school refurbishment programme it would buy more time to manage the reduction in the number of employees.
- 2.7 Taking all the above issues into account the Committee is asked to consider whether it would wish to progress the acceleration of St John's Primary School to utilise Highlanders Academy as decant accommodation with an approximate timeline of starting work in July 2014. St John's Primary School is the only school of those remaining requiring significant investment that has a suitability rating of C (Poor). It is also the only school, of those remaining, requiring significant investment, that is able to be accommodated within the former Highlanders Academy building as all other remaining schools require a larger decant facility.
- 2.8 In addition the Committee is asked to consider whether it would support the acceleration of Kilmacolm Primary School to start in July 2015 on the basis that it does not require decant accommodation and is in a poorer condition than the only other non-decant refurbishment at Gourock Primary.
- 2.9 Appendix 2 updates the SEMP Capital Finance Model and shows that it is all affordable in the current timescale despite the savings made. Appendix 3 summarises the overall proposal.
- 2.10 The above proposals however should be conditional on the Scottish Government, via the Scottish Futures Trust, providing increased funding to the Council in order to accelerate these 2 primary schools. This has the joint benefit of the Council delivering 2 primary schools in a much earlier timescale than had been envisaged whilst allowing the Scottish Government to report that the Schools for the Futures Programme has delivered 2 further primary schools at very little extra cost to the SFT.

3.0 RECOMMENDATIONS

- 3.1 It is recommended that the Committee consider the proposals contained in this report.
- 3.2 On the basis that the Committee support the proposals it is recommended that the Council Leader write to the Government seeking increased Government grant towards these proposals and Committee receive updates in respect of the Government's response.
- 3.3 That the financial implications be remitted to the Policy & Resources Committee and thereafter fed into the 2013/16 budget process.
- 3.4 That Officers communicate the Committee decisions to the schools impacted.
- 3.5 That the Committee agree that Highlanders Academy is no longer surplus to requirements and that a report should be submitted to the next Environment and Regeneration Committee seeking approval to bring the school back into use as temporary decant accommodation to support the SEMP.

Alan Puckrin Chief Financial Officer

APPENDIX 1

20 September 2012

Dear Council Leaders

Capital investment to support economic recovery

We are writing to you jointly to bring to your attention our shared priority of capital investment to support economic recovery and what we think can be done collectively to maximise this investment.

When economic conditions are fragile, shovel-ready capital investment by the public sector can provide an immediate stimulus and protect jobs and output. In particular, capital investment provides support to output and employment in the construction sector. The recent decline in Scottish output – with the Scottish economy returning to a technical recession following two consecutive quarters of declines in output of 0.1 per cent – was driven entirely by the construction sector.

For example, it is estimated that the Scottish Government's accelerated capital spending programme which brought forward nearly £350 million of capital spending over the period 2008-09 to 2009-10, and which Councils played a key role in delivering, supported around 5,000 jobs across the Scottish economy.

In addition to protecting jobs and output, capital investment has long-term benefits, including the creation of assets - such as public infrastructure – and can help retain vital skills and activity in key sectors such as construction.

We welcome all the work being undertaken across both Local Government and Scottish Government to continue investing under difficult financial circumstances, and that where possible all efforts are being made to accelerate investment to assist economic recovery. However we would welcome a re-focussing of our efforts to see collectively how much more can be done.

We understand that Councils will be exercising their ability to borrow sensibly now at current low interest rates, to maximise capital investment at a time when it is particularly needed. The question is whether more can be done and whether there is anything that can be done nationally to support you in making optimum use of your borrowing powers.

Additionally for some time, as you will be aware, the Scottish Government has been proposing to the UK Government that Scotland would benefit from additional spend on capital projects that are currently on hold from lack of available funds. There is potential that either additional or accelerated capital funding will become available through Budget Consequentials at the time of the UK Autumn Budget, and we would want this to be used wherever its impact on the economy will be maximised, whether through Councils or Scottish Government. We would therefore strongly encourage you to review now whether you have any 'shovel ready' projects that could be progressed quickly in your Council area, in the event that further funding becomes available at fairly short notice.

We therefore very much welcome your thoughts on what you believe can be done to further support economic recovery both by your own Council's actions and actions which could be initiated nationally. Equally we feel it is important to alert you to the potential availability of additional funding in order that you are in a position to maximise use of this if it were to become available.

We are copying this letter to Chief Executives and Finance Directors of Local Authorities for their information.

Yours sincerely,

FIRST MINISTER

COSLA PRESIDENT

APPENDIX 3

<u>SEMP – Proposals</u> <u>Implications</u>

1/ Operational

- a) Advances St John's Primary from 2019/20 to 2014/15
- b) Advances Kilmacolm Primary from 2022/23 to 2015/16
- c) Advances St Ninians from 2025/26 to 2023/24
- d) Advances St Mary's from 2020/21 to 2019/20
- e) Uses Highlanders Academy as decant school until 2016
- f) Programme delivered physically and financially by 2027/28

2/ Financial

- a) Allows £0.5 million reduction in annual capital grant from 2015/16.
- b) Uses £220k of the projected loan charge saving from 2013/14 to increase Prudential Funding by £3 million.
- c) Returns £230k loan charge saving to the General Fund to either reduce budget gap or reduce use of Capital Fund to finance SEMP.
- d) Requires £750k extra funded from one off costs over 2013/17 but saves £658k in one off costs over 2019/24 (Difference due to £200k cost to make Highlanders fit for refurbishment).
- e) Assumes £1.5 million funding from the Scottish Futures Trust towards the two accelerated refurbishments.

AP/CM 16/10/12
