Subject: RAMP UPDATE REPORT AND FUTURE PLANS

1.0 PURPOSE

1.1 The purpose of this report is to advise the Committee on what improvements to the carriageway and footway networks have been achieved with the RAMP investment strategy 2013-18.

2.0 SUMMARY

- 2.1 In 2012 the Council commissioned the production of a Roads Asset Investment Strategy Option Report in order to determine the level of funding required to improve and protect the Council's Roads Asset.
- 2.2 The report proposed a number of different investment scenarios and included predictions of their effect on the roads network based upon the output from a suite of prediction tools developed through the SCOTS Roads Asset Management Project.
- 2.3 The Council made the decision to adopt a 5 year investment plan. This resulted in an increased capital investment in the roads assets of £29 million over the 5 year period of 2013/14 to 2017/18.
- 2.4 The progress to date, which is nearing the end of the 4th year of investment, is shown on the maps contained in attachment 1.

3.0 RECOMMENDATIONS

- 3.1 That the Committee note the progress and improvement in the roads assets as a result of the investment over the past 3-4 years.
- 3.2 That the Committee note the options for proposed investment in roads assets.

Robert Graham
Head of Environmental and Commercial Services

4.0 BACKGROUND

- 4.1 In 2012 Inverclyde Council commissioned the production of a Roads Asset Investment Strategy Option report in order to determine the level of funding required to improve and protect the Council's Road Assets.
- 4.2 The report proposed a number of different investment scenarios and included predictions of their effect on the roads network based upon the output from a suite of prediction tools developed through the SCOTS Roads Asset Management Project.
- 4.3 The renewal investment scenarios reported within the document were:
 - 1. Continuance of existing spend
 - 2. Maintain a Steady State
 - 3. Reduce the backlog of life expired assets over a 5 year period
 - 4. Reduce the backlog of life expired assets over a 10 year period
- 4.4 The Council made the decision to adopt a 5 year investment plan based initially upon the first 3 years of option 4 above, which was later increased to a full 5 year investment. This resulted in an increased capital investment in the roads assets of 29 million over the 5 year period of 2013/14 to 2017/18.
- 4.5 That 5 year investment period will come to an end in March 2018 and this report is intended to demonstrate as a result of the monies spent within the first 3 years of investment the effect that this has had upon the roads assets within Invercive.

5.0 PROGRESS ON CARRIAGEWAYS

- 5.1 The carriageway asset is comprised of approx. 369Km of road, the Road Condition Index (RCI) value for Inverclyde, measured using the SRMCS survey machine, has improved from 49% in 2013 to 41% in 2016. Approx. 9% of the Council's roads are now in the poorest (Red) condition, having improved from 12% in 2013.
- 5.2 A total spend of £12.28 million on carriageways to the end of the financial year 2015/16 has seen approximately 30% of the network either resurfaced, thin surfaced, surface dressed or significantly patched.
- 5.3 It is expected this financial year will see an additional approximate 8% of the network treated for a further £2.6 million estimated spend which would bring the total network area treated to around 38% with a total spend of approximately £14.88 million.
- 5.4 The remainder of the £17.63 million RAMP carriageway investment (£2.75 million) will be spent in 2017/18, the final year of the 5 year investment strategy. This final spend of the 2013-18 investment will bring the total area of the network which has been improved to around 45%.
- 5.5 The Road Condition Indictor has improved around 3% per annum and future predictions on mprovement can be seen below.

	Carriageway	Actual /	Actual /	Inverclyde Carriageway Condition
Table 0.1	Spend / Budget	Predicted	Predicted	60
Carriageway		RCI %	Red %	50
2012/13	£1,220,000	49.2	12.7	40 —
2013/14	£2,997,000	46.3	10.8	30
2014/15	£3,755,000	43.1	10.1	10
2015/16	£4,315,000	40.5	8.6	0 —
2016/17	£2,600,000	36.9	6.7	2012/13 2013/14 2014/15 2015/16 2016/17 2017/18 Actual / Predicted RCI % Actual / Predicted Red %
2017/18	£2,747,000	35.7	5.8	,

- It should be noted that the RCI figure and related information has been taken from 2012/13 as some of the money was drawn down and spent in that financial year.
- 5.6 Attachment 2 identifies those roads which have been resurfaced, microasphalted or had significant patching since the RAMP spend commenced in 2012.
- 5.7 Attachment 2 identifies the proposed projects for the final year of the RAMP spend 2017/18.

6.0 Progress on Footways

- 6.1 The footway asset is comprised of approx. 450Km of pavement. The condition of the footways, measured from sample coarse visual inspection in 2012 showed approx. 20% of the footways exhibiting signs of deterioration where rehabilitation works should be considered. With 5% falling into the poorest (Red) condition where structural maintenance should be considered. It is estimated that these figures have fallen to 15% and 2% respectively by 2016 following the recent increased investment.
 - It is predicted that by the end of the current investment period (2017/18) the RCI will have reduced to approx. 12% and the poorest (Red) condition will have reduced to 1%.
- 6.2 A total spend of £1.281 million on footways to the end of the financial year 2015/16 has seen approximately 4% of the network either resurfaced or significantly patched.
- 6.3 It is expected this financial year will see an additional approximate 1.8% of the network treated for a further £515k estimated spend which should bring the total network area treated to around 5.8% with a total spend of approximately £1.796 million.
- 6.4 The remainder of the £3.296 million (£1.5 million) will be spent in 2017/18 the final year of the 5 year investment strategy. This final spend of the 2013-18 investment will bring the total area of the footway network which has been improved to around 11%.
- 6.5 The footways are not surveyed for condition in the same formal manner as the carriageways and therefore the footway condition is based on a 15% sample carried out 4 years ago. Based on this sample it is estimated that the footway condition indicator would fall from 21% to 12% as indicated in the table below.

	Footway Spend	Condition 3		Inverclyde Footway Condition
	/ Budget	& 4 Amber	Condition 4	75
Table 0.3 Footway		and Red %	Red %	20
2012/13	£153,000			15
2013/14	£248,000	21	4.3	10
2014/15	£295,000	22	3.6	0
2015/16	£585,000	21	1.6	2014/15 2015/16 2016/17 2017/18
2016/17	£515,000	18	1.0	Condition 3 & 4 Amber and Red % Condition 4 Red %
2017/18	£1,500,000	12	1.0	

- 6.6 Attachment 2 identifies those footways which have been resurfaced or had significant patching since the RAMP spend commenced in 2012.
- 6.7 Attachment 2 identifies the proposed projects for the final year of the RAMP spend 2017/18.

7.0 IMPLICATIONS

7.1 Finance

Financial Implications:

One off Costs

Cost Centre	Budget Heading	Budget Years	Proposed Spend this Report £000	Virement From	Other Comments
Roads Capital (Carriageway and Footway only)	RAMS	2017/18	4,247		Roads Capital currently receives £1.4m recurring annual allocation from General Capital Grant. Any allocation over & above this has been approved through the Budget process

Annually Recurring Costs/ (Savings)

Cost Centre	Budget Heading	With Effect from	Annual Net Impact £000	Virement From (If Applicable)	Other Comments
Roads Revenue	Routine Maintenance	2017/18	1,123		

- 7.2 Legal: None.
- 7.3 Human Resource: None.
- 7.4 Equality and Diversity: None.
- 7.5 Repopulation: This report has no implications for the Council's repopulation policies.

8.0 BACKGROUND PAPERS

8.1 None.

9.0 CONSULTATIONS

- 9.1 The Head of Legal and Property Services has been consulted with regard to the content of this report.
- 9.2 The Chief Financial Officer has been consulted on this report.
